SIMSbudgets Release Notes

*If you experience any problems with a release, first please clear your browser cache, then close and restart your browser.

After a SIMS software upgrade, users may see unusual performance such as popup windows not working properly, etc. The resolution is typically to clear the cache in your browser, then close and reopen the browser.

Below are links to instructions for clearing cache in most popular browsers.

Please contact SIMS Admin at simsgadmin@psu.edu if you have any questions or problems with a release.
